More info here: ⬀

+ Many more projects are showcased on my portfolio website ! ⬀

WORK EXPERIENCE

Software Developer
Monad Systems Oradea

07/2023 - Present
We're a company that focuses on establishing long-term relationships with customers.

Achievements/Tasks
- Worked on a healthcare mobile application for a hospital client. Made significant contributions to the front-end UI/UX design and functionality.
- Implemented complex front-end business logic and validation.
- Changed the entire decryption/encryption process. - Before my implementation, 25% of important information was lost, I managed with the new implementation to take it down to 0%.
- Created entire DEV environment + separated DEV from PROD.
- Created Google Cloud Functions + Scheduled Cloud Functions using Node.JS.
- Used version control practices to manage code changes and releases.
- Made a lot of refactoring to ensure code reusability in the entire app.

PROGRAMMING + TECHNOLOGIES

`Dart` `Flutter SDK` `Java` `Kotlin`
`Android SDK` `SQLite` `Firebase`
